All doors are standard 1-3/8" thick, available 6'8" or 8' heights, and are sold in a variety of widths. **Sold unfinished**, these doors are constructed of clear pine suitable for staining or painting, and are available in a variety of other wood species on a special order basis. All doors are constructed using an engineered core with a veneer. This greatly reduces the potential for warping, generally provides a better veneer quality, and is more environmentally sustainable. **Doors are for interior use only.**
